Call for Papers

As peer-reviewed archival publications, all accepted papers will be hosted on IEEE Xplore. Prospective authors are invited to submit high-quality papers representing original work. Submissions in all areas of intelligent robots and applications are welcome.
Please submit papers via the customary **Paper Plaza** process.

1.Format Guidelines

2.LaTex Template

3.MS Word Template

Papers should be six pages in length, with up to two extra pages. The number of pages includes the references, appendices, etc. A short video (1-minute maximum) can also be attached to your paper to supplement results (see Instructions below).

The **IROS Conference Paper Review Board** rigorously reviews all submissions and then through the IROS 2024 Senior Program Committee, renders acceptance decisions. Best Paper Awards in various categories are also selected by their respective committees.

Note: IROS no longer offers an RA-L+IROS submission option. Papers accepted at RA-L, T-RO, RAM, and T-ASE between August 1, 2023, and April 30, 2024 will be given the option to present at IROS2024.

INSTRUCTIONS: AUTHORS AND SUBMISSION PROCESS

All papers must be in English and submitted electronically in PDF (up to 6 MB) format via PaperPlaza. To ensure formatting compliance (e.g. margins, fonts and size) the templates should be used (links provided above).

A 1-minute video (up to 10 MB) can be added to supplement your paper. Videos are not mandatory; rather, it's an opportunity to augment one's paper to visibly showcase results. MPG, MPEG or MP4 video formats can be used. One can upload or re-upload the video attachment no later than March 5, 2024 (23:59 PST).

All papers accepted at the 2024 IROS are to be presented, in person, by the author/co-author or a knowledgeable person on the subject matter. All authors will also submit a 5-minute presentation video for IROS on-demand. If a paper cannot be presented in person due to the inability to travel to the conference, the author will be offered the option to present remotely. Alternatively, the 5-minute presentation video will be shown at the in-person conference.
